Litter Traps

recycledpark.com

recycledpark.com

Recycled park is the proposal to retrieve plastic litter from rivers and ports just before it reaches the sea. The plastics are recycled to give new value to the river. From the plastics we construct floating platforms for a new green environment; this are a plus for the city and role in the river water.

Education

Photo: **CLEAR RIVERS'** awareness and education programmes

Can Tho - Cai Khe Market

CLEARRIVERS

Project aims:

1. Install Litter Traps in proximity of Cai Khe Market;
2. Set up small scale community-driven recycling schemes;
3. Involve and learn from local communities;
4. Monitor, data-analysis and scale-up;

CLEAR RIVERS' Modular Litter Trap

Project outcomes:

1. Large amounts of waste retrieved daily;
2. Knowledge transferred to local stakeholders;
3. Data;
4. Manufactured circular and sustainable products made with recycled plastics to be implemented in the Mekong Delta Region;
5. Awareness raised through educational programmes;
